Sectional garage door **R30**

Low headroom double tracks
required headroom - min. 100 mm (manual)
Extension springs UM - mounted under tracks

Tension springs assembly. Under-track mounted springs are factory pre-installed and covered, what grants an easy installation and safe operation. Four spring system protects the door even in case of one spring failure.

Compact roller carriers - easy and fast to install.

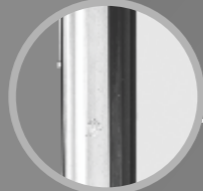

Adjustable vertical tracks.

Bottom bracket with footstep - handle.

Safe and reliable track system. All Cable pulleys covered to protect from the possibility of injury.

Double lip side seals will ensure the door is properly closed from the bottom to the top.

Bottom seal works as a minor shock-absorber and eliminates floor irregularities tightly closing the garage door.
